

Sessions Approach Gambling Log

Name _____

An IRS chief counsel advice memorandum from 2008 suggests that casual gamblers keep a log of gambling by **session**. This memorandum was reinforced by a more recent court case *Shollenberger vs Commissioner*. Keeping records with a session log will in many cases result in less income subject to tax.

A **session** is the time between buying in and cashing out. It would most commonly last a day unless the gambler changes location or gambling activity.

Keep funds for food and entertainment separate from gambling cash.
